CONTENTS OF VOLUME 20

Number 1

A. S. Bickel and R. W. Bickel — 1 Determination of near-optimum use of hospital diagnostic resources using the "GENES" genetic algorithm shell

T. W. Blackstad, T. Karagülle and O. P. Ottersen — 15 MORFOREL, a computer program for two-dimensional analysis of micrographs of biological specimens, with emphasis on immunogold preparations

J. M. Ribeiro, D. Juzgado, E. Crespo and A. Sillero — 35 Computer program for the reservoir model of metabolic crossroads

A. H. Bailie, R. H. Mitchell and J. McC. Anderson — 47 A computer model of re-entry in cardiac tissue

N. A. S. Taylor — 55 Computer integrated measurement of respiratory compliance

Software Survey Section — I MUCIDS

II IMAGO

II CHAMP

III TRANSMUTE

III Cardiac Output and Alveolar Ventilation

IV Generalization of the Paired T-Test

IV CMS – Compartmental Model Simulation

V XCITE

VI EEGANAL

Number 2

R. A. Mustard, A. Cosolo, J. Fisher, T. Pike, B. D. Schouten and H. T. Swanson — 65 PC-based system for collection and analysis of physiological data

R. De Meersman, N. Faroudja, P. Juris, J. Higgins and A. Gentile — 75 A computerized respiratory sinus arrhythmia program for the non-invasive assessment of parasympathetic activity

A. R. Cattan and J. Smith — 95 Computer control of fast protein liquid chromatography (FPLC)

R. M. Lewis 103 A computer program to aid in the preparation of reagent solutions

J. G. Sarver and R. L. Fournier 105 Numerical investigation of a novel spiral wound membrane sandwich design for an implantable bioartificial pancreas

J. L. Wisecarver, M. C. Haven and R. S. Markin 121 A macro-driven Lotus 1–2–3™ template for calculating and plotting receiver–operator characteristic curves for clinical laboratory tests

L. P. Brion 129 Use of a Lotus 1–2–3 spreadsheet to plot the confidence and the prediction intervals in linear regression analysis

Jih-Jing Yang, E. Ackerman and S. S. Rich 135 LINKERS: a simulation programming system for generating populations with genetic structure

Announcement 145 ICCC 90

Software Survey Section I

Number 3

S. Abboud, G. Barkai, S. Mashiach and D. Sadeh 147 Quantification of the fetal electrocardiogram using averaging technique

Y. Muslu 157 A numerical approach to activated sludge kinetics

G. C. Pogany 175 A QuickBasic computer model of spermatogenesis

M. A. M. Hassan and D. Issac 185 Utilization of a computer-controlled laboratory workstation (Biomek 1000) in routine radioimmunoassay laboratory

P. H. Barry and N. Quartararo 193 PNSCROLL, a software package for graphical interactive analysis of single channel patch clamp currents and other binary file records: under mouse control

M.-P. Gustin, C. Cerutti and C. Z. Paultre 205 Heterogeneous computer network for real-time hemodynamic signal processing

Erratum 217

Software Survey Section I

Number 4

P. E. Bourne and W. A. Hendrickson 219 A CPU benchmark for protein crystallographic refinement

R. G. Duggleby 231 A computer program in BASIC for calculating gradients used in chromatography, electrophoresis and centrifugation

J. M. Ribeiro and A. Sillero 235 An algorithm for the computer calculation of the coefficients of a polynomial that allows determination of isoelectric points of proteins and other macromolecules

M. H. Zeini, A. W. Mussa, G. N. Dutton and T. S. Durrani 243 Automatic chart reader—an example of computer systems for patients' data interpretation

J. Jossinet, G. Leftheriotis, F. Vernier and J. L. Saumet 253 A computerized bioelectrical cardiac monitor

A. Varray, J. Mercier and C. Prefaut 261 A BASIC software program to estimate cardiac output and alveolar ventilation

K. W. Hammond, R. J. Prather, V. V. Date and C. A. King 267 A provider-interactive medical record system can favorably influence costs and quality of medical care

A. M. van Ginneken, A. W. M. Smeulders, W. Jansen, J. P. A. Baak and I. Brooymans 281 Design of the diagnostic encyclopedia workstation (DEW)

M. A. Leon 293 Letter to the Editor

J. B. Korten 295 Letter to the Editor and Corrigendum

Software Survey Section I

Number 5

C. Cullander, J. R. Baker and T. F. Budinger 297 Rapid detection of spatial pattern by Fourier analysis

M. Fisher 311 Algorithms for the computation of spatial statistics

A. Faure, C. Nemoz and B. Claustrat 319 A graphical and statistical method for investigation of time series in chronobiology according to the cosinor procedure

A. Rao 331 A computer program for the derivation of non-parametric reference ranges from patients' results

J. M. Bland and D. G. Altman 337 A note on the use of the intraclass correlation coefficient in the evaluation of agreement between two methods of measurement

S. Mazzola, F. G. Mazzola and C. Di Marco 341 Organization and management of a database in the respiratory physiology

E. Krusińska and J. Liebhart 351 Robust logistic discriminant functions in diagnosing chronic obstructive airways disease

Ong Lean Suan 361 Computer-aided diagnosis and treatment of malaria: the IMEX system

L. Pellerin 373 A protein assay program for Lotus 1-2-3

Software Survey Section I

Number 6

M. A. L. Nicolelis, Chia-Hong Yu and L. A. Baccala 379 Structural characterization of the neural circuit responsible for control of cardiovascular functions in higher vertebrates

J. E. Ames IV, J. E. Strawn and W. K. Vaughn 401 Algorithm for the national allocation of hearts and heart-lungs

J. C. James III, N. S. Gantenberg and G. R. Hageman 407 A sample computer system for physiological data acquisition and analysis

P. J. McMillan and J. G. Harris 415 DataVoice™: a microcomputer-based general purpose voice-controlled data-collection system

L. I. Kuncheva 421 Fuzzy multi-level classifier for medical applications

P. Ferrer Salvans and L. Alonso Vallès 433 An epidemiologic approach to computerized medical diagnosis—AEDMI program

R. Schosser, W. Gross and K. Messmer 445 The evaluation of radioactive microsphere data: remarks on the use of the BMDP and SAS statistical software packages

P. Zuse, R. Hauser, R. Männer, M. Hausmann and C. Cremer 465 Real-time multiprocessing of slit scan chromosome profiles

Software Survey Section I BBAC

II Stenocardia and Hypertonia Diagnostic Program
